

When am I ever going to use this Math?

To change the world as an actuary!

WHAT DO THEY DO?

Actuaries “predict the future.” They use math to determine risk and provide solutions to some of our toughest problems.

WHERE DO THEY WORK?

- Insurance
- Healthcare
- Consulting
- Government
- Tech
- Basically, anywhere there is risk that needs to be managed!

WHY SHOULD I BE AN ACTUARY?

- High growth rate (projected growth rate of 24% by 2030)
- High salaries (expect \$55k - \$70k out of college)
- Employers pay for exams and offer paid study time while working

HOW DO I GET STARTED?

- Continue taking math classes in high school
- Check out colleges that support actuarial science by visiting [soa.org/institutions](https://www.soa.org/institutions)
- Exams for the first credential, Associate of the Society of Actuaries (ASA), typically take between 5-8 years to complete
- You can go to school and work while taking these exams!
